

PLANTRONICS DA55 USB AUDIO PROCESSOR

Enhanced intelligibility and audio performance on IP softphones

Plantronics DA55 USB audio processors offer a superior audio performance for IP softphones. They maintain volume at a user selectable level, reduce line noise levels and remove echo. All these features add up to great sound quality that helps your agents hear the customer more clearly and be heard more clearly themselves. To ensure your upgrade to IP softphones goes smoothly, the DA55 support both Plantronics H and P type of headsets, allowing you to maintain your investment in Plantronics high quality headsets.

Key features:

- **Maintains volume** – at the user chosen level regardless of incoming call volume
- **Outbound noise reduction** – enhances the performance of all PLT headsets to reduce the background noise a caller hears
- **Incoming noise reduction** – lowers incoming noise to enhance the agents listening comfort
- **Echo suppression** – for improved VoIP call quality

Enhancements:

- EncorePro headset
- SupraPlus headset

Optional accessories:

- Agent training cable

Product specifications
